Summary

2026 Computer Science Engineering graduate with strong foundations in Python development, machine learning, and data engineering. Experienced in developing end-to-end data-driven solutions and ML systems, with a structured, analytical approach to problem-solving.

Professional Skills

Languages: Python, Java, C, SQL, HTML/CSS
Data & Analytics: NumPy, Pandas, Exploratory Data Analysis, Statistical Analysis,Matplotlib, Seaborn , Power BI
ML/AI: PyTorch, Scikit-learn, GenAI, Transformers, Hugging Face, RAG, Pipecat
Web Dev: Flask, REST APIs, Bootstrap, Tailwind, PostgreSQL
Data Eng: Hadoop, Spark (basic), Data Cleaning, Wrangling
DevOps/Tools: Linux, Git, Github, Docker, Apache Kafka, Kubernetes, Jupyter, GCP, BigQuery, JSON, YAML, XML
Behavioral Skills: Leadership, Team Collaboration, Problem Solving, Communication, Adaptability

Education

B.Tech in Computer Science and Engineering — SUIIT, Sambalpur University *2022–2026*
CGPA: 8.628 / 10 — Notable Coursework - DBMS,Machine Learning, Operating System, Data Mining, Computer Networks

Foundation Certificate in Data Science and Applications — IIT Madras *2023-2024*
CGPA: 8.6 / 10 — Notable Coursework – Machine Learning Techniques, Statistics, Deep Learning,Data Structures and Algorithms

Higher Secondary Education — Guidance English Medium School, Bhubaneswar *2020-2022*
Percentage: 88.8%

Secondary Education — St. Anne's Convent School,Baripada *2020*
Percentage: 93%

Projects

Mini RAG Chatbot — LangChain, Hugging Face, FAISS
Built a QA chatbot using Retrieval-Augmented Generation (RAG); achieved 90% test accuracy, implemented in-memory caching of embeddings to speed up retrieval.

Real-time Pipeline for Sentiment Analysis — Python, Apache Kafka, PySpark, NLTK, PostgreSQL, Docker
Automated data scraping from Reddit; added sentiment analysis and keyword classification of subreddits. Built a Kafka–Spark streaming pipeline with windowed aggregation; stored results in PostgreSQL and visualized insights with Matplotlib dashboards .

Hospital Management System — HTML,CSS,Python, Flask, SQLite, REST API
Created a flask backend app to streamline and automate Hospital Management and doctor appointment booking. Implemented user login and REST endpoints to manage patient data and doctors.

Classification of Oil seeds and Nuts using Transfer Learning — Pytorch,CNN Architectures
Developed a CNN-based image classification model for oil seeds and nuts to support automated cleaning and enhance industrial packaging system by 94%. Built a custom regional dataset and used different pretrained models to improve model accuracy and relevance.

Academic Certifications and Achievements

Data Science with Python -Aligarh Muslim University(MOOC) *Jul'24-Nov'24*
Computer Vision-NPTEL *Jul'24-Nov'24*
ML Core Team Lead- Google Developer Student Club, SUIIT *Jul'24–Jul'25*
GATE CS/IT 2025-Qualified with 92 percentile *Mar'25*
TCS ion IT-Scored above 84% with 100% in Python Programming Test *Apr'25*

Other Languages and Interests

Languages Known: English (Fluent), Hindi (Fluent), Odia(Fluent), Bengali(Fluent)
Interests: Cloud Computing and Security, Agentic AI
